Highlights in 2004–2005

UBC's School of Community and Regional Planning (SCARP) is one of Canada's largest and oldest graduate planning programs, with a 50-year heritage in education, capacity building, research, and service. The school is focused on participatory planning for environmental, social, and economic sustainability. SCARP has the equivalent of 15 faculty and a masters and doctoral teaching program with over a 150 students registered in degree programs each year. SCARP is also home to the Centre for Human Settlements, which leads major collaborative capacity building and research programs focused on community-based planning for poverty reduction in Brazil, Vietnam, and other Asian countries. It also has a suite of "sustainability collaboratories", research laboratories focusing on information and communication technologies, transportation, urban design, and disaster preparedness planning.

Highlights

During the year the program was reviewed and re-accredited for another five years by two site visit teams of senior academics and practitioners, one established by the U.S. Planning Accreditation Board and the other by the Canadian Institute of Planners. In the summary words of the U.S. report: "SCARP is a program positioned for excellence that has made tremendous progress in the last five years."

Over the past year, 132 Master's and 18 Doctoral students enrolled in UBC's program in Community and Regional Planning (SCARP). Five Master's and 5 Doctoral students received fellowship support. During this period 47 master's and 2 doctoral students graduated from the program.

Yossi Berechman joined the School as the first appointment to the CN Chair in transportation planning.

Leonie Sandercock was awarded the 2005 Dale Prize for Excellence in Urban Planning, the citation for which recognizes her as having "profoundly shaped how we think about community engagement."

Publishing activity at the School was again brisk, with four faculty publishing books.

Peter Boothroyd was awarded the Faculty of Graduate Studies 2005 Killam Award for Excellence in Graduate Teaching and Supervision.

Two Canada Foundation for Innovation Awards supported the establishment of the Active Transport Collaboratory (Larry Frank, Bombardier Chair in Sustainable Transportation) and the Disaster Management Collaboratory (Stephanie Chang, Canada Research Chair in Disaster Management and Urban Sustainability).

Vision

The recommendations from a review of the Masters curriculum, which includes suggestions arising from the accreditation reviews and innovations that capitalize on the expertise of the new faculty appointments over the last couple of years, will begin to be implemented in the coming year.

At the beginning of June SCARP will host its second biennial Jamboree for Doctoral Students in Planning. Over a week 30 students from doctoral planning programs across North America will meet with students currently in SCARP's program to discuss their research interests and participate in workshops on topics led by the School's faculty and two internationally recognized planning scholars and practitioners: Professors Bent Flyvbjerg (University of Aalborg, Denmark) and Martin Wachs (University of California, Berkeley).

In the coming year major attention will be focused on conducting a web-based dialogue with planning schools around the world on Planners for Tomorrow. This will be in preparation for an international student forum at UBC in June 2006 as part of the events contributing to the World Urban Forum (WUF) in Vancouver in the week following (www.plannersfortomorrow.ca). Organized by SCARP students the initiative will result in a manifesto for delivery to the WUF and the World Planners Congress which will immediately precede it.

Graduate Award Winners 2004–2005

Sarah McMillan

Canadian Institute of Planners (CIP) Award for Academic Excellence including a book prize and certificate bearing the CIP seal. The CIP award is granted to the student member who achieves the highest academic standing over the length of the program.

Peter Russell

Real Estate Foundation award in Community & Regional Planning. A \$1,000 award is offered by the Real Estate Foundation to graduate student in SCARP who exhibits excellence in academic, professional and community activities in community planning and/or real property development.

Kristina Bouris

H. Peter Oberlander \$1,200 Prize and Medal. The award honours H. Peter Oberlander, the founding Director of the School of Community & Regional Planning and subsequently the founding Director of the Centre for Human Settlements.

Rebecca Koeller

American Institute of Planners prize including a \$1,200 prize from SCARP. The American Institute of Certified Planners Prize is awarded to the most outstanding graduating student in Community & Regional Planning.

School of Community and Regional Planning Scholarships

Four scholarships totaling \$1,000 each are awarded to students entering the second year of their Master's degree at SCARP and are awarded for academic excellence. The Scholarships were established in 1990 from interest received on major grants the School received in the 1960's from the Richard King Mellon Charitable Trust Grant and the Donnor Canadian Foundation Grant. In 2004-2005, the scholarships were given to Helen Ma, Gina Mitteco, Brian Patterson, and Mark Sloat.

MASTERS PROGRAM 2004-2005

SCARP's Master's Program constitutes the core of its academic and professional teaching program. As one of the best-known and comprehensive Planning programs in North America we received 187 formal applications for 2004–2005 as compared to 218 in 2003-2004, 141 in 2002–2003, and 119 in 2001-2002. We continued to improve our successful program completion rate, graduating 47 students in the 2004–2005 academic year.

For September 2004 the applicants accepting our offer had undergraduate degrees in:		Fifty-five applicants were admitted and 33 accepted the offer. The mean age was 29 (4 were under 24 years old). Sixteen males and seventeen females accepted our offer.

Lectures/Seminars

Communication and Public Presentation Skills Seminar

By Carol Boothroyd - September 2004

Carol Boothroyd, one of Vancouver's most sought after communications consultant, gave her highly popular seminar for students, faculty and staff. The seminar provided participants with a solid base of public presentation skills that can be applied in public meetings, professional presentations and classroom settings.

Evaluation and Prioritization of Transportation Investment Projects in New York City

By Dr. Joseph (Yossi) Berechman – November 26, 2004

Not Just a Flash in the Plan

By SCARP PhD Students – January, February & March 2005

A lecture series by the PhD Students of the School of Community and Regional Planning that explored contemporary planning issues, as well as the knowledge, skills and abilities necessary for future planners.

Presenting:

Blinding Speed: Urban Transportation by Matti Siemiatycki

Global Sparks: International Planning by Danielle Labbe and Leslie Shieh

Green: Ecology and Planning by Meidad Kissinger and Pascale Poudenx

The Beat of the Urban Heart: Planning for Health by Clare Mochrie and Sylvia Vilches

Fusing Regions: Ur and Suburbia by Ryan McNally and Laura Tate

The Alchemy of Place: Art, Design, and the Urban Home by Steven Dang and Katie Warfield

A Dammed-up Reservoir Ability: Women and Professionalization of Planning in Canada

By Sye Hendler – March 3rd, 2005

Transforming Cities: The Power of Imagination

By Leonie Sandercock - March 14th, 2005

This lecture was part of St John's College Living Out the Metropolis Speaker Series.

The Central Coast Land and Resource Management Plan

By John O'Riordan – March 2005

John gave a three-part lecture series including:

- Role of First Nations in the Development of the Plan
- Principles of Sustainability and How Applied in the CCLRMP
- Lessons in Governance for Sustainability Based on the Principles and the Roles of the Key Plaers in the CCLRMP

The Mega-Projects Disaster Gene: From the Bay Bridge to Iraq

By Brent Flyvbjerg – June 1st, 2005

Professor Flyvbjerg is author of Rationality and Power (1998), Making Social Science Research Matter (2001) and Megaprojects and Risk: An Anatomy of Ambition.

Newsbytes: Newsletter of the SCARP Community

The first issue of SCARP's on-line newsletter was published in the Fall of 2000. Newsletters are published, in November, January and March of each year. The newsletter brings students, alumni, staff, faculty and other members of the SCARP community up-to-date on news and events in the School.

Centre for Human Settlements

The Centre for Human Settlements (CHS) takes as its mission “to advance knowledge of the dynamics of, and effective methods for, democratically planning the sustainable development of settlements.” The interdisciplinary research and capacity-building programs at CHS address a multiplicity of complex community development issues. In collaboration with academic, governmental and NGO partners, CHS advances knowledge through participatory action research, field tests of proposed planning methods, institutional capacity building, and mutual learning.

CHS has an established record of research in planning for sustainable development that explores local and global paths towards achieving it. In 1991, CHS was designated an International Centre of Excellence in International Development by the Canadian International Development Agency (CIDA). Since then, the Centre has been awarded four other major CIDA grants; funding from the United Nations Development Program (UNDP) for a training program on planning for sustainability in Hanoi, Vietnam; and funding from the Social Sciences and Humanities Research Council (SSHRC) to initiate an international gender and development network.

Under the CHS umbrella, the Disaster Preparedness Resource Centre (DPRC) has been successful in obtaining funding for a variety of research and training projects and conferences. Faculty Associates have also been active in individual research projects funded by a broad spectrum of national and international funding agencies. Current projects are summarized below.

British Columbia

EMERGENCE Canada (Estimation and Mapping of Employment Relocation in a Global Economy in the New Communications Environment): A Study of Employment Relocation in the Global Economy

Principal Investigator: Penny Gurstein; Co-Investigators: Ursula Huws, Analytica Social and Economic Research, Ruth Buchanan, UBC Faculty of Law, and Laura Johnson, University of Waterloo School of Planning

On March 17, 2003, the SSHRC INE (Initiative on the New Economy) program provided funding of \$253,000 for this three-year research project which links with the European Union and Australian-funded EMERGENCE Projects (Website: www.emergence.nu). The EMERGENCE Canada project (www.chs.ubc.ca/emergence/) examines the outsourcing of telemediated employment between firms within Canada and between Canada and Asia, and possibly Latin America, and compares these practices to ones in Australia and the EU. Telemediated or ‘e-work’ refers to labour that involves processing information that can be transmitted by a telecommunications link.

In Year 2 of the project a number of presentations were made and workshops organized as an outgrowth of the project. The workshops that the PI, P. Gurstein, organized include:

- 2005 Workshop Organizer, EMERGENCE Canada Workshop at Parliament Hill, “Canadian Policy Responses to Global Sourcing,” Ottawa, Ontario, April.
- Workshop Organizer, CATA/ EMERGENCE Workshop at National Club, “Trends in Global Sourcing,” Toronto, Ontario, April.
- 2004 Workshop Organizer, Rockefeller Foundation International Team Meeting, “Mapping the Global Dimensions of Telemediated Employment Relocation,” Bellagio Center, Italy, December 8 – 14, 2004.
- Panel Organizer, “Mapping the Global Dimensions of Telemediated Employment Relocation,” Association of Collegiate School of Planning (ACSP) 2004 Conference, Portland, Oregon, October.
- Expert Participant, “Virtual(ly) Research SSHRC ITST Knowledge and Innovation TechnoCulture Summit,” UBC, May.
- Organizer and Presenter, “EMERGENCE Canada Project Meeting,” Second Workshop of the SSHRC INE-funded Canadian EMERGENCE Project, U. of Toronto, April.

The presentations made regarding EMERGENCE Canada by the PI include:

- 2005 “Canada’s Response to Outsourcing: Findings from EMERGENCE Canada,” CATA Outsourcing Committee, Toronto, ONT, June.
- “Reconsidering Live/ Work: Home and Neighborhood in the 24/7 Digital World,” EDRA 36, Vancouver, BC, April.
- “Highlights of EMERGENCE Canada Research,” EMERGENCE Canada Workshop at Parliament Hill, *Canadian Policy Responses to Global Sourcing*, Ottawa, Ontario, April.
- “EMERGENCE/ CATA Research Results: Impact on Canada,” CATA/ EMERGENCE Workshop at National Club, *Trends in Global Sourcing*, Toronto, Ontario, April.
- 2004 “Telemediated Employment Relocation for an eMaybe Country: Canada as a Source and Destination,” Rockefeller Foundation International Team Meeting, “Mapping the Global Dimensions of Telemediated Employment Relocation,” Bellagio Center, Italy, December 8 – 14, 2004.
- “EMERGENCE Canada,” Rockefeller Foundation International Team Meeting, “Mapping the Global Dimensions of Telemediated Employment Relocation,” Bellagio Center, Italy, December 8 – 14, 2004.
- “Off-Shore and Near-Shore Telemediated Work: Cases from Canada, United States and India,” Association of Collegiate School of Planning (ACSP) 2004 Conference, Portland, Oregon, October.
-

Of particular note is a prestigious, highly competitive grant that the PI was awarded. The Rockefeller Foundation awarded the PI funding to organize an international workshop on “Mapping the Global Dimensions of Telemediated Employment Relocation” at the Bellagio Centre, Italy. The PI is also a partner in an European Union grant that was awarded in 2004, WORKS (Work Organisation and Restructuring in the Knowledge Society), funded by EU's 6th Framework 'Citizenship and Governance in the Knowledge Society' Program for a series of international workshops, conferences and scholarly publications on telemediated employment.

Government Responses to Poverty and Income Inequality and their Effects on Children and Families (a collaborative study within The CHILD Project: Building a Consortium for Health, Intervention, Learning and Development in a Community Setting)

Principal Investigator: Penny Gurstein; Co-Investigators: Jo-Anne Fiske, First Nations Studies, UNBC, and Jane Pulkingham, Sociology/Anthropology, SFU

This Income Assistance project (www.earlylearning.ubc.ca/CHILD/research_child_poverty.htm) has received funding of \$322,000 for a 5-year study within the larger, SSHRC MCRI-funded grant for the CHILD (Consortium for Health, Intervention, Learning and Development) Project. Ethical Approval for this study was received on June 13, 2003.

Despite a relatively strong economy, a significant minority of Canadians, about 1 in 10 working age households, are being left behind in deep and continuing poverty and mounting income inequality. Their ranks disproportionately include single parent families (primarily lone mothers), some recent immigrants, persons with disabilities and aboriginal Canadians. This project focuses on an understanding of the experience of children and families in these circumstances in British Columbia, and especially the experiences of families who are currently undergoing reductions in income security, child care, employment standards, access to justice and other supports to families. The project tracks 30 families from urban and rural locales over three years to understand the impact that social policies play in poor people's lives.

We argue for poverty studies that do not demonize the poor and place them in categories of “deserving” and “undeserving.” Rather, research needs to seek to understand the underlying causes of poverty and demystify the experiences of the poor so that appropriate policy initiatives can be formulated. Research on poverty mainly looks at aggregate data. Relatively few studies investigate the experiences of poverty on a qualitative basis. This study intends to provide a multi-methods perspective on this issue by both researching the large quantitative indicators of poverty and the qualitative life stories. This research will help frame the policy context for interventions to improve the lives of children at risk.

This study occurs in two sites: urban (Vancouver, the northeast section covered by Main-Renfrew; Broadway-Waterfront) and rural/remote (Bulkley Valley—the area centred around Smithers covering Hazelton to the west and Huston to the east). The selection of an urban and rural community is based on the assumption that the effects are likely to be different given the economic restructuring and the sense that there is a growing urban-rural divide. North-East Vancouver has a high concentration of lone mothers on Income Assistance and this should make it easier to recruit/select lone mothers for interviews, while the Bulkley Valley has been clearly impacted through loss of public sector jobs.

In Year 2 of the project, the semi-annual interview with the research participants commenced.

Sri Lanka

Education for Democratic Planning in Sri Lanka

Project Leaders: Penny Gurstein & Michael Leaf

This five-year capacity building project began in June 1997 with funding of \$750,000 from the Association of Universities and Colleges of Canada (AUCC) through the University Partnerships in Cooperation and development Program of CIDA. It aims to contribute to a stable and pluralistic democracy in Sri Lanka by strengthening the community and regional planning system at local government levels. Its goals are to (1) establish a graduate-level community and regional planning program at the University of Peradeniya and undergraduate programs at the Universities of Ruhuna and Jaffna; (2) carry out short-term colloquial programs for practising Sri Lankan planners at the regional, provincial, city, district, divisional and local community levels; (3) offer graduate fellowships to Sri Lankan faculty members to study community and regional planning at UBC; and (4) carry out pilot projects or in depth case studies on community and regional planning issues in Sri Lanka. The project was extended from its original end date of March 2002 to allow the completion of the Sri Lankan PhD student.

The "Education for Democratic Planning" project has been successful in a number of activities. These include:

1. *Policy workshops.* The policy workshops brought together the partner universities and practicing planners with the result of *improving communications between these two groups*. The workshops focused on understanding the role of planners in a democratic society as perceived by planners themselves, policy makers, academicians, and community leaders. The policy workshops also tackled the locally relevant issues identified in the needs assessment: regional planning and regional economic development at the University of Ruhuna; participatory planning, sustainable tourism and low income housing at the University of Peradeniya; and post war reconstruction at the University of Jaffna. Understanding the role of planners in a democratic society and focusing on local issues helped the project staff design courses, activities, and methodologies that could eventually be applied to planning programs.
 2. *Training/colloquium workshops.* The training/colloquium workshops discussed the locally relevant issues identified in the policy workshops in more detail. These issues were lack of trained social planners, focus on physical planning, and lack of consultation with local community. The workshops provided inputs into the curriculum development process and helped to ensure relevance in the development of planning courses at the Sri Lankan partner universities. The results were *planning courses that are locally relevant and which draw on lessons learned from planning programmes offered at universities in other countries*. This also included the development of pedagogical approaches relevant to the Sri Lankan context.
 3. *Curriculum development workshops and the securing of formal approval for new planning programmes at partner universities.* These aimed towards offering new planning programmes at the three partner universities, including the enhancement of Sri
-

Lankan knowledge of international approaches to planning education and the securing of formal institutional approaches to planning education.

4. *Inviting Canadian planners and planning educationists to the training/colloquium workshops and enrolling three Sri Lankan faculty members to study at SCARP.* These activities established and augmented partnerships between UBC and the three Sri Lankan universities including enhancing Sri Lankan knowledge of international approaches to planning education.

As particular success, was that the project raised awareness of planning issues in Sri Lanka. For example, the Jaffna workshop was the first of workshop or conference organized at the University of Jaffna since the war had commenced. Because it brought together academics from throughout Sri Lanka to discuss planning for reconstruction and rehabilitation of war-torn areas, it was considered a very significant event.

Asia

Canada-Indonesia Symposium - The New Shape of Government in Indonesia and Implications for Bilateral Relations

Project Leader: Michael Leaf

Project supported by a grant for \$26,500 from the Asia Pacific Initiatives Conference Fund, Foreign Affairs Canada

On October 12, 2004, the Centre for Southeast Asia Research hosted a one-day symposium on the future of Canada-Indonesia bilateral relations in collaboration with Simon Fraser University International and the Indonesian Consulate in Vancouver, and with financial support from Foreign Affairs Canada. The intent of the symposium was to promote dialogue on the changing nature of Indonesian society and economic development in light of ongoing changes in the Indonesian government, in particular the recently completed cycle of elections resulting in the presidency of Susilo Bambang Yudhoyono, and to generate new ideas regarding the nature of Canadian engagement in Indonesia. The symposium was held at the SFU Harbour Centre campus and was attended by over 70 participants in addition to the presenters.

Chaired by CSEAR Director Michael Leaf, the symposium was led off by two keynote addresses by Randolph Mank, Canadian Ambassador to Indonesia, who reviewed current trends in Indonesian democratization and development, emphasizing Canada's role and interests in particular, and Eki Syachrudin, Indonesian Ambassador to Canada, who discussed current political developments relative to the broad sweep of political and social change in Indonesia since the time of independence in 1949. This introductory session was followed by three panels, covering: domestic, regional and international security, including questions of political reform, national unity and the war on terrorism; the outlook for the economy and current factors shaping the investment climate; and social development, human rights and the environment, with specific attention to Canadian aid priorities. Speakers on these panels included: Dr. Rizal Mallarangeng (Director of the Freedom Institute), Prof. Dr. Azyumardi Azra (Rector, Universitas Islam

Negeri), and Dr. Jacques Bertrand (University of Toronto) on the security panel, which was moderated by Dr. Abidin Kusno (UBC); Dr. Umar Juoro (Center for Information and Development Studies), and Greg Elms (Canada-Indonesia Business Development Office) on the investment panel, moderated by Chris Dagg (SFU); and Dr. Amanda Katili-Niode (Syarifa Foundation), Rustam Ibrahim (YAPPIKA), and Dr. Roy Culpeper (North-South Institute) on the social development panel, moderated by Michael Leaf. The final panel, chaired by Dr. Irman Lanti of the Habibie Center, brought back all of the speakers in a discussion of what recommendations could be put forth regarding specific Canadian initiatives across all three of these broad themes. Ideas from the presentations and the ensuing discussions will be compiled in a brief summary document focusing on the symposium's recommendations, which was followed by the publication of the symposium proceedings.

The Asian Urban Laboratory

Project Leaders: Michael Leaf and Abidin Kusno (Institute of Asian Research)
Project supported by grants totaling \$135,000 from the Canada Foundation for Innovation and the BC Knowledge Development Fund, 2005.

The Asian Urban Laboratory (AUL) is now under development at the IAR with support from the Canada Foundation for Innovation and the BC Knowledge Development Fund. This new facility, under the direction of Abidin Kusno of the Centre for Southeast Asia Research, will be dedicated to promoting collaborative research among local, national, and international scholars working on both historical and contemporary aspects of urbanism and urban change in Asia. Establishing the AUL within the IAR will thus provide critical support for the work of Dr. Kusno and various other members of the University in two regards; first, through the digitization and utilization of existing graphic materials on Asian urbanism, establishing a Digital Image Library of materials on Asian cities and urban change, and second, through the development of an Asian Urban Database which will draw together statistical, cartographic, and textual materials focused on selected Asian cities. Taken together, these two components will provide a core resource for promoting collaborative, interdisciplinary research on urban change throughout the region, thus helping to complement and strengthen UBC's position as Canada's world-leading academic institution for the study of Asian urbanization. Building upon the interdisciplinarity of the IAR itself, the facility would thus establish a unique national research capability that would attract scholars from various disciplines across the Social Sciences and the Humanities to the study of cities in Asia.

Challenges of the Agrarian Transition in Southeast Asia

Project Leader: Rodolphe DeKoninck, University of Montreal
Co-investigators: Michael Leaf, et al.
Project supported by: Social Sciences and Humanities Research Council, Major Collaborative Research Initiatives, for \$2.5 million, from 2005 – 2010.

The Social Sciences and Humanities Research Council of Canada has awarded a Major Collaborative Research Initiative (MCRI) grant for the study of "The Challenges of the Agrarian Transition in Southeast Asia" (or ChATSEA). This five-year, \$2.5 million program will

critically examine the ongoing societal transformations in Southeast Asia from primarily non-urban populations dependent upon agricultural production and organized through rural social structures, to predominantly urbanized, industrialized and market-based societies. The consortium of researchers involved in this program is led by Rodolphe De Koninck of the University of Montreal, and includes Michael Leaf, Director of the UBC Centre for Southeast Asia Research, along with others from Canada, Europe, and Australia and collaborators from Indonesia, Malaysia, the Philippines, Thailand, and Vietnam. The work of this program is organized around six themes: 1) agricultural intensification and territorial expansion; 2) increasing integration of production into market-based systems of exchange; 3) accelerating processes of urbanization and industrialization; 4) heightened population mobility both within and across national borders; 5) intensification of regulation, as new forms of private, state and supra-state power are developed and formalized to govern agricultural production and exchange relationships; 6) processes of environmental change that modify the relationship between society and nature to reflect new human impacts and new valuations of resources. Dr. Leaf will act as the process coordinator for the urbanization and industrialization theme, thereby creating links between the ChATSEA program and other UBC initiatives regarding Asian urbanization.

Visiting Lectures

RMES 501, November 2004

PLAN 540A, Planning Project, Year 1, Omnibus, October 2004

PLAN 548C, Master’s Project, April 2004

Anthony Dorcey

Visiting Lectures

Lecture in RMES Watershed Management March, 1 2005

Special Accomplishments in Teaching

Taught 6 courses and graduated 1 doctoral and 7 masters students

Larry Frank

Visiting Lectures

Fellowship with the Healthway Foundation of Western Australia from November 21, 2004 – January 1, 2005. Conducted 4 workshops and gave 2 presentations.

Penelope Gurstein

Visiting Lectures

Design Critic, UBC SCARP Urban Design Studio, April

Michael Larice

Visiting Lectures

PLAN 540A, Planning Project, Year 1, Omnibus, October 2004

Timothy McDaniels

Special Accomplishments in Teaching

Held a series of lectures and workshops in IRES to help students make progress on their theses.

William Rees

Visiting Lectures

Agroecology (UBC Faculty of Agricultural Sciences) 10 February 2005-04-01

Resource Geography (Simon Fraser University) 7 February 2005

Christianity and Nature (Regent College) 26 January 2005

The Urban Experience (Semester in Dialogue, Simon Fraser University, Harbour Centre) 19 January 2005

Conservation Biology (UBC Faculty of Science [Biology/Zoology]) 16 November 2004

Leonie Sandercock

Visiting Lectures

Planning Project, Year 1, Omnibus (PLAN 540A), Sept 2004

Special Accomplishments in Teaching or Supervision

Co-teaching new course, *Digital Ethnographies*, (with Giovanni Attili), 20 Masters and PhD students in Cosmopolis Lab (my 5th course for this year. I am organizing the project component of the course, giving advice on story component of final presentations, and attending all classes)

Appendix H: Honourary and Adjunct Appointments

- **Doug Aberley**, Adjunct Professor
Doug is a SCARP alumnus who worked for 15 years as a rural regional planner, community development animator, and municipal administrator. He is editor of recent volumes on bioregional mapping and ecological planning, and is currently conducting a variety of research on topics related to the history and practice of bioregionalism. Doug teaches *Planning Project: Applied Bioregionalism* (PLAN 540D).
 - **Larry Beasley**, Adjunct Professor
Larry is Director of Central Area Planning and Co-Director of Planning for the City of Vancouver. He is Chair of the Development Permit Board, has sat on the Urban Design Panel, and is the City Project Manager for the Trade and Convention Centre Expansion Review Program. With 22 years of civic service, Mr. Beasley has been the City's Senior Area Planner and was director of the Vancouver Legacies Program in 1986, raising \$3.5 million from the private sector for civic projects. He has advised Ottawa's National Capital Commission, Toronto's Royal Commission on the Harbourfront, the City of Auckland, New Zealand, the cities of Xi'an and Tianjin in China, and various Canadian and U.S. cities. He helped found the Forum for Planning Action and the Little Mountain Neighbourhood House, and is on the Board of Vancouver International Film Festival. He teaches *Practical Practice: City Planning as a Craft* (PLAN 548P).
 - **Pat Carney**, Adjunct Professor
Senator Carney had a career in journalism and economic consulting before entering politics. She is a former federal M.P. and Cabinet Minister (1980-1988) and President of the Treasury Board. She was appointed to the Senate of Canada in 1990. She received the UBC Alumni Award for Distinguished Service for 1989. In May 1990 Senator Carney received an Honourary Doctor of Laws degree (LLD) from UBC. She received a second Honourary Doctor of Laws degree from the British Columbia Open University in March 1991.
 - **John Friedmann**, Honorary Professor
John Friedmann has been appointed an Honorary Professor in the School and continues as Professor Emeritus of Planning at UCLA. He was founding professor of UCLA's Program for Urban Planning in the Graduate School of Architecture and Planning, and served as its head for 14 years. He is currently involved in research on urbanization processes with special reference to China. His most recent publications include *Empowerment: A Theory of Alternative Development* (1983), *Cities for Citizens: Planning and the Rise of Civil Society* (with Mike Douglass), and *The Prospect of Cities* (2002). Friedmann is married to Leonie Sandercock, Professor of Urban Planning and Social Policy who joined the SCARP faculty in July 2001. He teaches *Advanced Planning Theory* (PLAN 602), and *PhD Colloquium* (PLAN 603).
 - **Julia Gardner**, Adjunct Professor
Julia is principal owner of Dovetail Consulting. Her areas of specialization include public participation, sustainable development, strategic planning, community-based volunteer stewardship, collaborative processes, program evaluation and policy analysis.
 - **Michael Gordon**, Adjunct Professor
Michael is Senior Central Area Planner for the City of Vancouver overseeing planning in the downtown peninsula. He is also serving on the Council for the Planning Institute of British Columbia. Michael teaches *Housing Policy* (PLAN 583).
 - **Wayne Greene**, Adjunct Professor
Wayne is the Director of the Disaster Preparedness Resources Centre at the Centre for Human
-

Settlements as well as the Director of the Department of Health, Safety and Environment at UBC. He has a PhD in nuclear physics from the University of Iowa and since 1974 has had an active professional interest in health protection and environmental hazards monitoring.

- **Robin Gregory**, Adjunct Professor
Robin is a Senior Researcher for Decision Research and the Director of Value Scope Research, Inc. His fields of specialization are: Risk management and perceptions of hazardous technologies; valuation of nonmarket environmental resources; choice and preference behaviour; economics and psychology of value; stakeholder involvement in environmental risk and resource decisions; and decision making and group negotiations under uncertainty.
 - **Kari Huhtala**, Adjunct Professor
Kari Huhtala is a planning consultant with considerable experience in social, land use, community, environmental, agricultural, and arts and cultural planning projects. He has worked for more than 25 years as a policy, social and development planner with the City of Richmond, City of Vancouver, the Corporation of Delta, and as a planning consultant on municipal land use policies in B.C. Kari has worked to ensure that the interests of the public are the foundation in planning our communities and that humanizing our urban and community environment are a priority. He teaches *Social Planning Policy* (PLAN 588).
 - **Norma-Jean McLaren**, Adjunct Professor
Norma-Jean McLaren is a consultant, trainer and facilitator working in the area of diversity, community development and organizational change since 1988. She holds a B.A. in Child Care Counseling and a M.A. in Education (Multiculturalism in Education). In 1992 she established her own consulting company and in that capacity has worked in training, consultation and facilitation in a broad range of settings including colleges, hospitals, universities, police departments, airport security, resource corporations, federal and provincial departments and crown corporations, non-profit agencies and in communities across Canada. She teaches *Cross-Cultural Planning* (Plan 548E).
 - **Jon O'Riordan**, Adjunct Professor
Jon O'Riordan is a former Deputy Minister of the Ministry of Sustainable Resource Management in the British Columbia Provincial Government. He has completed 35 years in the public service, mostly with the Provincial Government in environmental management and land and resource planning. In his most recent position in Sustainable Resource Management he was responsible for completing six regional land and resource management plans. He also led the development of Land Information BC where all the provincial data and information on legal title and resource values on Crown and private lands are stored. This will be the first integrated information base in the province and when completed in 2007 will be a leading edge example of an integrated geo-referenced data base for any provincial jurisdiction in Canada. He teaches *Natural Resources Planning & Governance* (PLAN 548F).
 - **Freda Pegani**, Adjunct Professor
Since 1998, Freda Pegani has been the Director and founder of the Campus Sustainability office at the University of British Columbia. She is responsible for implementing the Sustainable Development Policy and reporting annually to the Board of Governors on progress towards sustainability.
 - **Gordon Price**, Adjunct Professor
Gordon Price recently finished his sixth term as a City Councillor in Vancouver, BC. He also served on the Board of the Greater Vancouver Regional District and was appointed to the first board of the Greater Vancouver Transportation Authority (TransLink). Mr Price is also a regular lecturer on transportation and land use for the City of Portland, Oregon and Portland State
-

University. In addition, he has written extensive essays on Vancouver and transportation issues and has been published in numerous journals. He recently won the Plan Canada Award for Article of the Year. Mr Price also writes a monthly column for *Business in Vancouver* on civic issues, and sits on the Board of Northwest Environment Watch and the International Center for Sustainable Cities. He teaches *The Deceptive City: Vancouver and Its Times* (Plan 548H).

▪ **Paul Rosenau**, Adjunct Professor

As principal of EKISTICS, Paul heads an energetic team of design professionals including architects, landscape architects, planners and urban designers. He has been involved in town planning consulting since 1987. Paul has moved to the forefront of town planning practice with a vision of 'humanizing the suburbs.' Through EKISTICS, he is spearheading a rethinking of standard land development models and their underlying assumptions. Having an intuitive design sensibility, Paul is striving to reform contemporary designs and planning theory based on the need to reestablish a sense of place in neighbourhoods and to build on what is locally unique and endearing. Paul teaches *Residential Site Planning: Part 2 – Design and Graphic Presentation* (PLAN 548W) and *Residential Site Planning: Part I – Inventory and Analysis* (PLAN 582A).

▪ **Eric Vance**, Adjunct Professor

Eric Vance has over 20 years of experience as a professional planner, economist and management consultant, specializing in community and regional planning, economic development, socio-economic impact assessments, organization and policy, strategic and business planning, and market analysis. Eric is also an adjunct professor in the graduate School of Community and Regional Planning at the University of British Columbia, where he teaches *Economic Evaluation Techniques for Planning* (Plan 513).

▪ **Jay Wollenberg**, Adjunct Professor

Jay is President of Coriolis Consulting Corp. With over 20 years of practice as a professional planner and real estate analyst, he has been responsible for a wide array of market analysis (for retail, service, residential, office, and industrial uses), financial analysis, land use planning, community planning and other projects. He has advised development companies, investors, businesses and all levels of government. Jay teaches *Urban Development Market and Financial Analysis* (PLAN 561).

▪ **Raymond Young**, Adjunct Professor

Ray is a Partner in the Vancouver law firm of Lidstone, Young, Anderson. His teaching experience includes courses at UBC in municipal law, and land use and planning law. He teaches *The Legal Context of Planning* (PLAN 506)—basic concepts in administrative law, municipal law, and managing development in the municipal context.
